STARLINK
AUTHORISED
RESELLER

STARLINK

Starlink High Performance Connectivity

- High Speed & low latency
- 100% coverage
- Easy to install and relocate
- Next day delivery
- Flexible and short-term contracts
- Global installation and service

Starlink Advantages

IMPROVED PRODUCTIVITY

Reliable communications to support enhanced operational and logistical efficiency. Starlink's speed and bandwidth allows for far greater and faster communication methods than ever before such as video calls, uploading large CAD files.

ENHANCED SAFETY AND SITE SECURITY

With continuous, high-speed connectivity, you can monitor all your construction sites in real-time, deploy advanced IoT led security systems, and ensure health and safety for everyone on and off site through instant and reliable communication capabilities.

COST EFFECTIVE SOLUTIONS

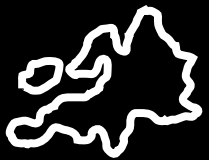

With hardware purchase or leasing options and a range of fixed site and mobility plans, we'll work with you to fully understand your business needs and provide the most competitive and cost-effective solution for your business. A single dedicated service portal for management and visibility of all your sites.

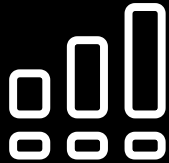

How Starlink works

We're the leading authorised Starlink global reseller, backed by our experienced and knowledgeable team ready to connect your business.
